

Palette preview

for paper revision (original + enhanced)

Pages – QUALITATIVE (method / dataset dimension):

1. Original (current, with cyan) – baseline
2. Original (cyan -> Tol teal #117733) – proposed fix
3. Enhanced Option 1 – Okabe-Ito (CB gold standard)
4. Enhanced Option 2 – Paul Tol bright
5. Enhanced Option 3 – ColorBrewer Dark2

Pages – SEQUENTIAL (noise level α , ordinal):

6. Noise A – viridis
7. Noise B – cividis
8. Noise C – YlOrRd (warm)
9. Noise D – Blues (cool)

Each page shows:

- color swatches
- grayscale rendering (simulates B&W print)
- deuteranopia simulation (red-green CB)
- mock charts (color + B&W) + line plot

Original (current, with cyan)

Color

Grayscale (B&W print)

Deuteranopia simulation

Mock paired_bars (color)

Mock paired_bars (B&W)

Mock per-noise curves

Original (cyan -> Tol teal #117733)

Color

Grayscale (B&W print)

Deuteranopia simulation

Mock paired_bars (color)

Mock paired_bars (B&W)

Mock per-noise curves

Original (cyan -> black #000000)

Color

Grayscale (B&W print)

Deuteranopia simulation

Mock paired_bars (color)

Mock paired_bars (B&W)

Mock per-noise curves

Option 1: Okabe-Ito (CB gold standard)

Color

Grayscale (B&W print)

Deuteranopia simulation

Mock paired_bars (color)

Mock paired_bars (B&W)

Mock per-noise curves

Option 2: Paul Tol bright

Color

Grayscale (B&W print)

Deuteranopia simulation

Mock paired_bars (color)

Mock paired_bars (B&W)

Mock per-noise curves

Option 3: ColorBrewer Dark2

Color

Grayscale (B&W print)

Deuteranopia simulation

Mock paired_bars (color)

Mock paired_bars (B&W)

Mock per-noise curves

Noise Option A: viridis (matplotlib default, CB-safe)

Color (noise α : light=low, dark=high)

Grayscale (B&W print)

Deuteranopia simulation

Mock: color = noise α (color)

Mock: color = noise α (B&W)

Mock: per- α curve

Noise Option B: cividis (CB-optimized, prints well)

Color (noise α : light=low, dark=high)

Grayscale (B&W print)

Deuteranopia simulation

Mock: color = noise α (color)

Mock: color = noise α (B&W)

Mock: per- α curve

Noise Option C: ColorBrewer YlOrRd (warm sequential)

Color (noise α : light=low, dark=high)

Grayscale (B&W print)

Deuteranopia simulation

Mock: color = noise α (color)

Mock: color = noise α (B&W)

Mock: per- α curve

Noise Option D: ColorBrewer Blues (cool sequential)

Color (noise α : light=low, dark=high)

Grayscale (B&W print)

Deuteranopia simulation

Mock: color = noise α (color)

Mock: color = noise α (B&W)

Mock: per- α curve
