

(a) f_1 paired bars

std MLC (no abstention) with abstention (per-row colour) $\alpha = 0.0$ $\alpha = 0.1$ $\alpha = 0.2$ $\alpha = 0.3$

RF averaged across all datasets; abstention vs. standard MLC --- detailed by α

(b) Jaccard paired bars

(c) Abstention rates (bar=abs, dot=aabs)
